

Academic Exchange by Japanese and Korean medical students  
the 11<sup>th</sup> forum was held

For 5 days from February 3<sup>rd</sup> to 7<sup>th</sup> in 2010, the 11<sup>th</sup> forum of academic exchange by Japanese and Korean medical students was held in Yonsei University in Seoul City. This time, 11 Keio students in 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup> grade took part in this forum and deepened our friendship.

We raised “Mind in Medicine” as a theme of this forum, and made discussions with each other, focused on doctors’ ‘mind’ in medical service. We also conversed with Dean and other many teachers, took lectures on the theme, experienced the operations of “*da Vinci*” which is a robot for surgery, went sightseeing in Seoul City, and went through Korean traditional culture.

These activities gave both Keio and Yonsei student good opportunities to establish identity as a medical student. And it would be lucky that this activity, which is the annual forum, will be helpful for making friendly relations with both countries, not only restricted to exchanges between universities.
