場所 総合医科学研究棟 1F ラウンジ

演題 **The mechanism for the effect of Chinese medicine on strait episode of complex diseases**

Jing-Yan Han, MD, PhD.

The mechanism for the effect of Chinese medicine on strait episode of complex diseases
Chinese medicine has been applied in clinic for more than two thousands years, which presents as a healthcare system using compound formula preparation, treatment based on syndrome differentiation and individualization thus has advantage in dealing with strait episode of complex diseases. However, the mechanism underlying Chinese medicine is not fully understood up till now.

The speaker, using the theory of blood stasis and activating blood to remove stasis in Chinese medicine, classified microcirculation dysfunction induced by different causes, such as ischemia and reperfusion, stress, LPS, common cold, investigated the pathogenesis and progressing of each of which. Furthermore, the speaker will present the mechanism for compound formula of Chinese medicine with potential of toxifying Qi and activating blood, removing heat to cool blood, identified the ingredient in the compound formula responsible for respective effect.

担当 内科学（消化器） 教室
